

# YMC School of Chromatography

## ABOUT US

YMC India was established in 2008 with the vision to create a brand value by delivering the BEST Quality Services and Product Support to its customers. In the year 2019, YMC India has come up with Centre of Excellence Lab- AR&D Center at Hyderabad to provide solutions in analytical and custom purifications. We cater solutions into various industries like Pharmaceuticals, Biopharma, Food, Agriculture, Petro Chemical, Clinical and drug discovery challenges. We also initiated “YMC School of chromatography” to collaborate with Academic Institutions/ Universities to share our industrial experiences and provide training to the students/ scholars and to assist in research projects. Mainly provide hands on experience of chromatography equipments on live applications/ challenges.

For a modern world continuing education is an absolute must. This is independent from the position one holds; training will improve the skills of every individual. Especially in the complex and cost intensive field of liquid chromatography, improved skills will result in better efficiency, safety and reliability of their daily work.

YMC School of chromatography- Skill Development training courses can provide an overview on the basics of HPLC- method development, purification of compounds and their characterization. We provide chromatography open access to new industry professionals, research scholars, recent graduates and students with our wide range of short term / midterm classroom and Lab based Courses.

## OUR MOTTO

Skill Development programs are to provide necessary and basic skills required for every individual in the field of chromatography techniques with hands on experience on key instrumentation.

Moreover, YMC encourage participants to come up with innovative ideas to design their own projects with the help of YMC Technical Experts advice and guidance to design and execution of live Projects at YMC R&D Centre Equipments. Trainees will have access to Instrumentation like Handling HPLC and UPLC/UHPLC method development, Preparative / Flash Purification & UHPLC- MS (Multimode).

## AIM

To refine the technical skills and to attain a better grasp of fundamental principles behind scientific methods. Enhance research skills and prepare the participants for their future academic and Industry assignments.

ISO 9001:2015

# Hands on Training

**(HPLC, UHPLC-MS, LC-MS/MS, PREP and FLASH systems)**

We provide training in both theory and practical with hands on experience on live samples.

HPLC/UHPLC Method Development and its applications

Method validation and its importance in BA&BE studies, Bio analytical services

Tuning parent ion scan or full mass scan, product ion scan, MRM method.

Projects works and research oriented concepts

Pharmacokinetic & toxicological studies

Forced degradation and stability studies

1 day workshop to 3months internship

Software- Empower/Chemstation/K-Prep/Chembeango

Selected candidates can be referred to pharmaceutical companies

**Certified Courses**

Skill development  
& advanced  
training center

## Seminar & Training Workshop :

- YMC provides classroom and on-site lab training for students, freshers and working professionals.
- Trainees can have access to equipment's like UPLC-MS (Highly sophisticated instrument from Waters), Prep-HPLC(Chiral and achiral purification analysis).
- Providing Knowledge on Peptide and protein chemistry.
- HPLC chiral screening and achiral method development strategies to develop a robust method.
- QbD approach and suggestions with a training certificate.

INDIA / JAPAN / AMERICA / GERMANY / KOREA  
TAIWAN / SINGAPORE / CHINA
